BDRCloud

Key features

Key Features of BDRCloud

Continuous Data Protection - Backup files/folders starting from every Minutes to Hourly/Daily/Weekly basis.

Interruption-free Backup - Intelligently picks-up the backup exactly from where it left off after an interruption

Unique Reverse/Forward Incremental Approach- BDRCloud exposes every incremental as a virtual full backup.

Round the Clock Restore - Easily restore the backup data to the original or to an alternate location, from anywhere at anytime.

Best-in-class Data Retention Technology - Flexible retention policies that helps to archive the deleted data for years.

Secured Cloud Backup over WAN - The AES-256 bit algorithm encrypts the backup data both at the flight and at rest.

Explicit Reporting with Email Notification - A range of advanced reporting and notification features with timely mail alerts.

Bandwidth Throttling - Throttle the speed of the backup data transfer for a selected time to reduce the network traffic.
